

# shelli

Shelli delivers responsive comfort designed for the rhythm of everyday work.

A synchro-tilt mechanism with user-set tension keeps movement balanced and natural, while a 60mm seat slide lets users find the right seat depth in seconds. A memory-foam seat with sewn upholstery provides consistent cushioning for lasting comfort throughout the day.

The ergonomic back supports posture without restricting movement, with incremental height adjustment to position support precisely where it's needed while keeping the shoulders free. An inflatable lumbar air cushion provides adjustable lower-back support for all-day comfort.

- 4D multi-functional armrests and neck roll included as standard
- Adjustable lumbar support for lower-back comfort
- Synchro-tilt mechanism with user-set tension
- 60 mm seat-slide depth adjustment
